ABOUT US

At Apeium doing the right thing is at the heart of everything we do. With commitment to focus on issues that matter for our customers, people and the broader community.

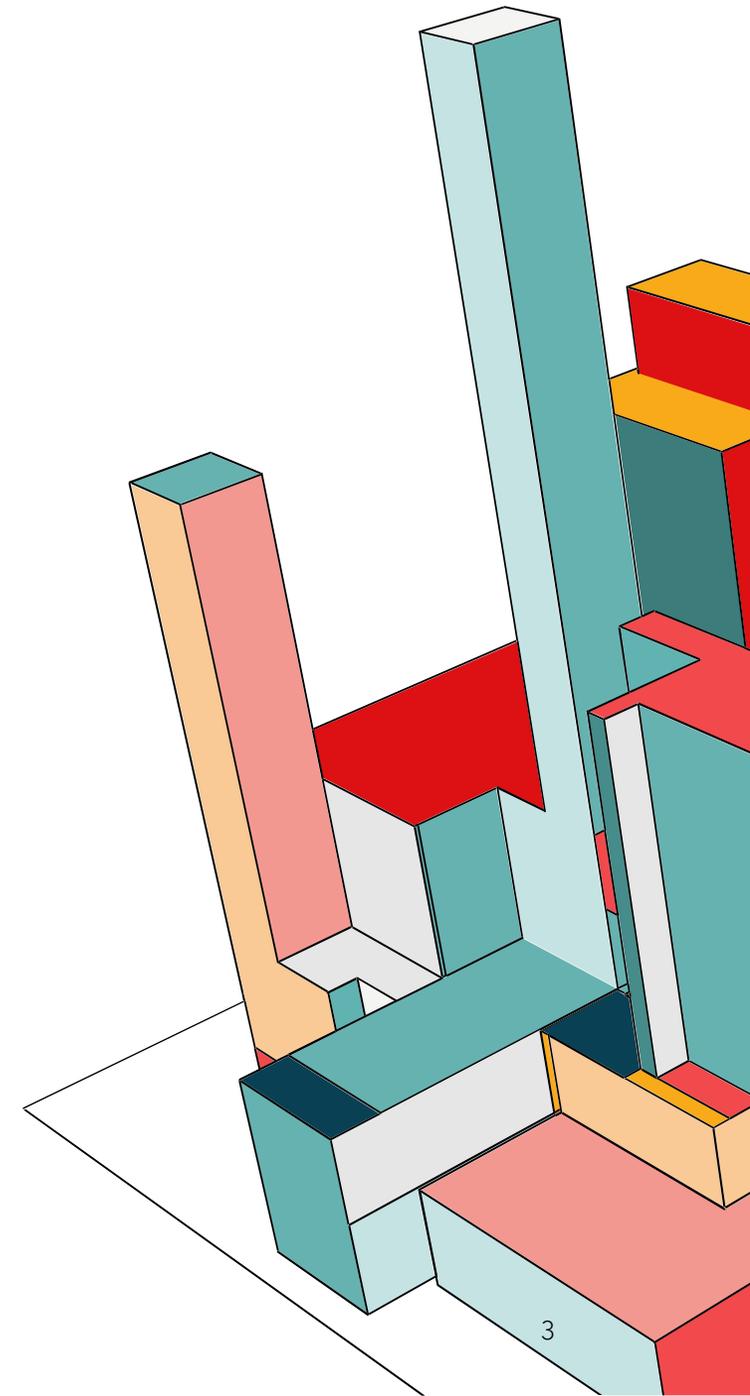

The idea of launching a blockchain based token is to provide wealth services (Crypto based) to like-minded investors and liquidity providers. This project is designed to engage and invest the money in portfolios (coin sets) or managed crypto funds once the Initial Dex Offering (IDO) ends.

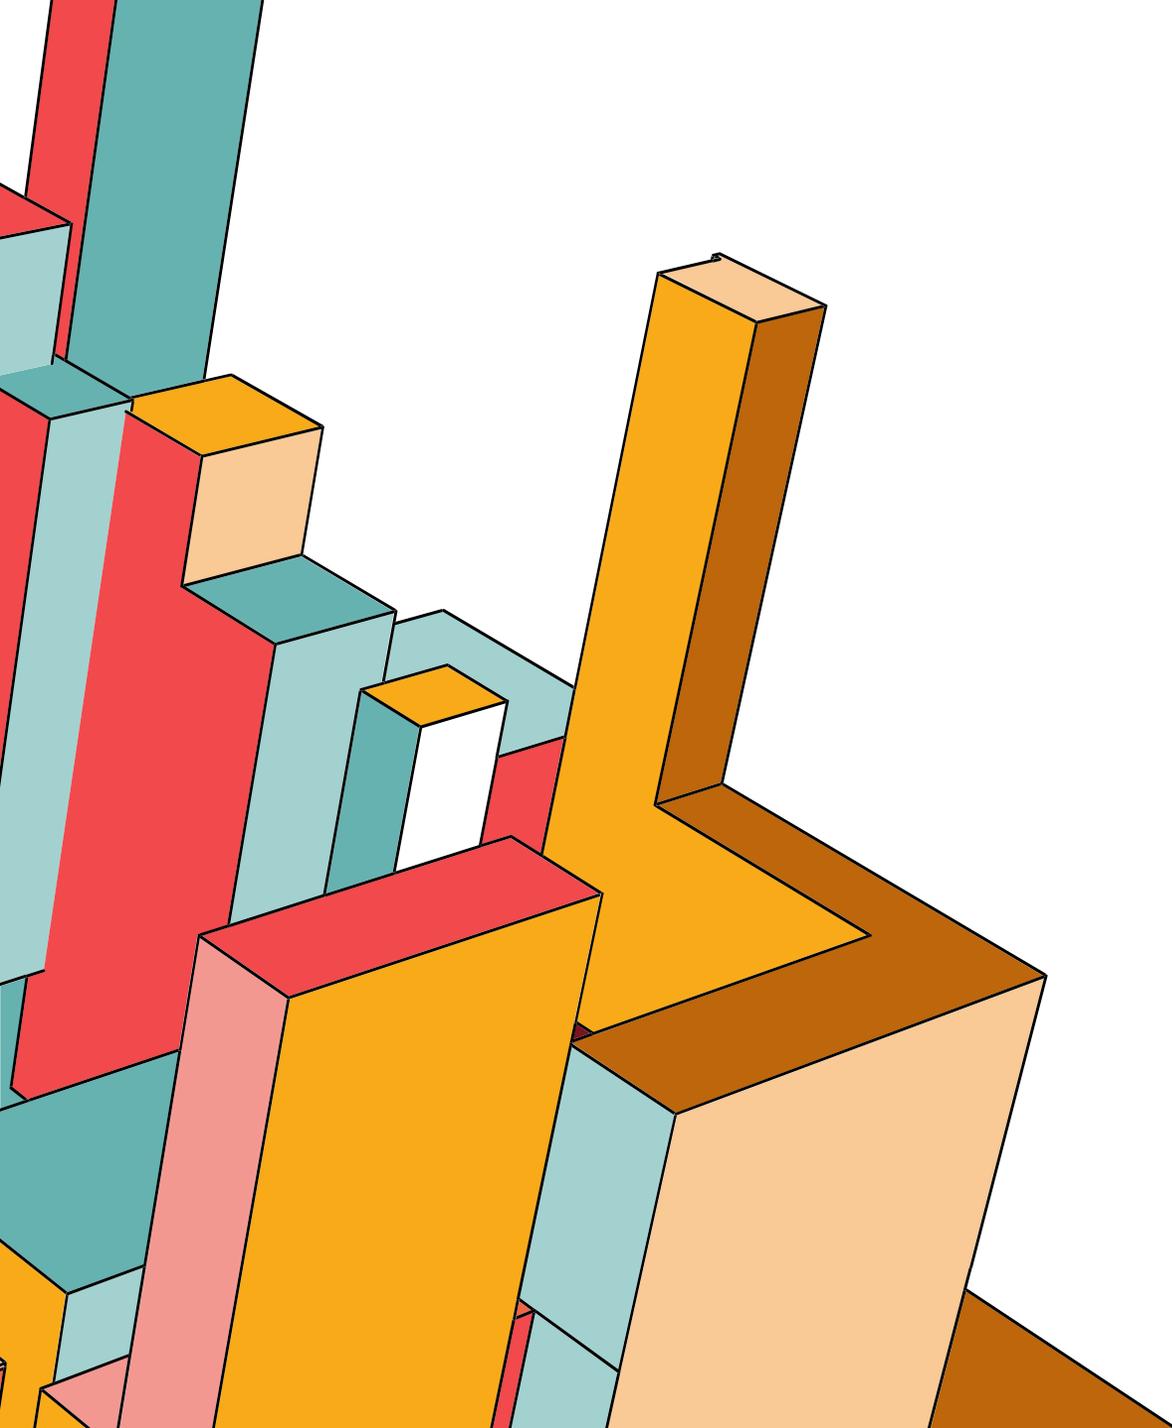

NEED FOR A TOKEN

There comes a point for any business where fund raising becomes necessary for further development and expansion. At least business' ideas to continue growing. The Crypto industry is in fact the easiest one in terms of fund raising. It offers more opportunities to get access to finances than any other industry. Even for projects that don't have any direct connections to blockchain or even IT.

Apeium tokens will be generated and an IDO event in DEX exchanges will be completed before using the generated revenue for reinvestment in Portfolio based cryptos/coin sets.

SOLUTION

CLOSE THE GAP

Apeium token generation and IDO are similarly designed to raise funds for a cause. It is to simply reinvest the money in bigger and better portfolios or coin sets to reap substantial ROI. Distribution of the ROI with long-term HODLERS and liquidity providers including Apeium as a company.

TARGET

100 Million Tokens will be generated.

ROAD MAP

SUMMARY

At Apeium, we believe in giving 110%. By using efficient portfolio building methods, we help like minded investors, hodlers and LP providers grow and foster a healthy return on investments from Crypto Markets. We thrive because of our market knowledge and a great team behind our project. We believe, "Efficiencies will come from proactively transforming how we do business."
